

ENVIRONMENTAL POLICY STATEMENT

Flamefast Fire Systems Limited (the Company) is committed to adopting practices and procedures within its operations which are aimed at minimizing and preventing environmental impacts.

The Company undertakes to comply with all current legislation and best working practices relating to the protection of the environment and endeavour to constantly improve environmental performance.

In pursuing the objectives of this policy, the Company commits, as far as reasonably practicable, to the following objectives:

- To continually manage existing and new processes to help minimize pollution of air, land and water using best available methods
- To reduce consumption of natural materials, fuel, water and energy by employing renewable or recyclable resources where ever possible
- To minimize the production of any waste materials from our operations and dispose of that waste by a method that will help reduce harm to the environment
- To consider environmental issues when making new investments
- To provide training for employees and the required resources and facilities to allow for the implementation of this policy
- To encourage suppliers and sub-contractors to demonstrate a responsible attitude to the protection of the environment, in recognition of the impact their products and activities may have on the environment
- To develop - in conjunction with the appropriate authorities - procedures to help limit any environmental impact and site emergencies
- To avoid nuisance to neighbours of the Company's property and on site activities and consider their rights and opinions when managing activities

The Environmental Management Policy shall be reviewed at least annually or following significant legislative changes, where improvements have been identified it will be communicated to all staff and made available to visitors of the Company who may use the Company's premises and whom may request it.
